The digital future of cash!

Monero for Merchants

monero.eco

Privacy

Monero transactions are private and untraceable by default.

Security

Through the use of advanced cryptographic techniques, the receipt of payments is secure and unalterable.

Acceptance

Accept payments from customers locally or worldwide without expensive fees or waiting times.

Decentralisation

Monero is a community currency that is not controlled by a central authority.

"Smartphone with internet and off you go!"

Be part of the revolution

Take the first step today!

With Monero, you are not only a trader, but also a pioneer in the new era of digital commerce. It's not just a question of technology, but also of trust, community and the future.

As easy as cash, only digital!

Step 1:

Install a Monero wallet on your smartphone. There are many trusted and free apps in the App Store, Play Store and F-Droid. Cake Wallet, Monerujo, MyMonero and Mysu have proven themselves.

Step 2:

Generate a QR code with the amount to be paid directly in the Wallet app for each sale.

Step 3:

Show the QR code to your customer. They simply scan it with their own Monero wallet and confirm the payment. Done!

"Payments are secure and unchangeable"

Advantages

For your business

Fast transactions: Receive payments in almost real time.

Low fees: No credit card or bank fees.

New customers: Appeal to the growing community of crypto enthusiasts.

Future-proof: Stay up to date with technological developments and trends.
